

SCHOOL DISTRICTS AND THEIR REPRESENTATIVES IN THE STATE SENATE

This is a crosswalk listing school districts and their representatives in the State Senate. It has been compiled from data supplied by the State Education Department.

No significance should be attached to the order in which Senators are listed. They are listed by the numerical order of their Senate District (i.e., the member representing Senate District 1 is listed before the representative of District 2). Accordingly, the first Senator listed may **not** represent the largest portion of the district.

Errors have been found in the listings due flaws in the information supplied by the state.

Some listings may seem in error but be correct. Under the State Constitution, Assembly and Senate Districts may divide cities, but may not divide towns (except when the town is large enough in population to justify more than one representative in either house). On the other hand, school districts commonly do cross town lines. Consequently, a Senator may be listed as representing a school district because the school district includes a small portion of a town which he or she represents.

Maps illustrating Senate District boundaries are available through each Senator's website. See here:
